

I CLAIM:

1. A styling and curling hairbrush comprising:
an elongated tubular body having an outer shell
surface and a longitudinal interior hollow
forming an air channel;
said air channel being open at one end and closed at
the opposite end;
air exit openings extending from the air channel to
the outer shell surface;
at least two bristle rows distributed
circumferentially with respect to the tubular
body and spaced apart from each other;
at least two air guidance elements mounted between
and substantially parallel to the bristle rows;
said air guidance elements being closed in the radial
direction and forming at least one flow channel
and open or having openings at least toward one
adjacent bristle row; and
an air stream divider mounted at the open end of the
air channel, said air stream divider adapted to
divide an air stream into an air stream flowing
into the air channel and an air stream flowing
along the flow channel and thereby along on the
outer shell surface of the tubular body.

2. A styling and curling hairbrush as claimed in claim 1, wherein the air guidance elements further comprise a radially directed outer segment forming a slotted sleeve with one bristle row each disposed in a slot.

5

3. A styling and curling hairbrush as claimed in claim 2, wherein the outer segments of the air guidance elements are disposed concentrically with respect to the tubular body.

10 4. A styling and curling hairbrush as claimed in claim 2 or 3, wherein the outer segments of the air guidance elements are each connected by a base segment with a sleeve which encompasses and fastens on to the tubular body and the bristle rows penetrating the sleeve.

15

5. A styling and curling hairbrush as claimed in one of claims 1 to 3, wherein the flow channels formed by the air guidance elements have a cross sectional area in the form of a U and are adapted to the curvature of the outside of the
20 tubular body.

6. A styling and curling hairbrush as claimed in claim 4, wherein the flow channels formed by the air guidance elements have a cross sectional area in the form of a U and

are adapted to the curvature of the outside of the tubular body.

7. A styling and curling hairbrush as claimed in one of
5 claims 1 to 3, wherein the air flow channels formed by air guidance elements are closed at ends directed toward the free end of the brush.

8. A styling and curling hairbrush as claimed in claim 4,
10 wherein the airflow channels formed by air guidance elements are closed at ends directed toward the free end of the brush.

9. A styling and curling hairbrush as claimed in claim 5,
15 wherein the airflow channels formed by air guidance elements are closed at ends directed toward the free end of the brush.

10. A styling and curling hairbrush as claimed in claim 6,
20 wherein the airflow channels formed by air guidance elements are closed at ends directed toward the free end of the brush.

11. A styling and curling hairbrush as claimed in one of claims 1 to 3, further comprising a hot air blower disposed in a handle.

5 12. A styling and curling hairbrush as claimed in claim 4, further comprising a hot air blower disposed in a handle.

13. A styling and curling hairbrush as claimed in claim 5, further comprising a hot air blower disposed in a handle.

10

14. A styling and curling hairbrush as claimed in claim 6, further comprising a hot air blower disposed in a handle.

15 15. A styling and curling hairbrush as claimed in claim 7, further comprising a hot air blower disposed in a handle.

16. A styling and curling hairbrush as claimed in claim 8, further comprising a hot air blower disposed in a handle.

20 17. A styling and curling hairbrush as claimed in claim 9, further comprising a hot air blower disposed in a handle.

18. A styling and curling hairbrush as claimed in one of claims 1 to 3, wherein the hairbrush further comprises a

coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.

19. A styling and curling hairbrush as claimed in claim 4,
5 wherein the hairbrush further comprises a coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.

20. A styling and curling hairbrush as claimed in claim 5,
10 wherein the hairbrush further comprises a coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.

21. A styling and curling hairbrush as claimed in claim 6,
15 wherein the hairbrush further comprises a coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.

22. A styling and curling hairbrush as claimed in claim 7,
20 wherein the hairbrush further comprises a coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.

23. A styling and curling hairbrush as claimed in claim 8,
25 wherein the hairbrush further comprises a coupling piece

with which it can be set as an attachment onto a hand-held device with a hot air blower.

24. A styling and curling hairbrush as claimed in claim 9,
5 wherein the hairbrush further comprises a coupling piece with which it can be set as an attachment onto a hand-held device with a hot air blower.
